APPENDIX - MARKED-UP VERSION SHOWING CHANGES TO CLAIMS

IN THE CLAIMS:

5 Please amend Claim 24 as follows:

24. (Amended) The holder of claim 1, wherein the lengths of flexible material each axially extend [extending] in second segments along two adjacent commissure posts and attach to a rigid structure that abuts the annular sewing ring at the inflow end of the valve, wherein the second segments of two adjacent lengths of flexible material cross over a second time along the
10 common commissure post prior to attaching to the structure.
